

**Linfield to host
Business After Hours**

As part of its sesquicentennial celebration, Linfield College will host Business After Hours from 5:15 to 7 p.m. Thursday.

Business After Hours is a social event of the McMinnville Area Chamber of Commerce. Cost is \$6 at the door or \$5 with reservations. Reservations may be made by calling the chamber at 503-472-6196.

Linfield College, now entering its 150th year, is one of the oldest institutions in the state.

The event will be held in Ford Hall, Building 58B on the school's Keck Campus. It's best to enter on Keck Drive, next to Albertsons, or Booth Bend Road.

Yvette Saarinen

Bottom Line**Express Personnel
awards scholarships**

Express Personnel Services of McMinnville has awarded scholarships to Kathryn Huit, executive director of the nonprofit Yamhill County Historical Society, and small businessman Robert Smiley, owner of Wine Country Woodcraft.

Huit will use her stipend to attend the McMinnville Area Chamber of Commerce's Community Leadership Program and Smiley will use his to attend its Advanced Leadership Institute. Both programs are designed to encourage development of business, personal and community leadership.

"Express is committed to strengthening community through volunteer leadership," said local franchise owner Stevie Whited, who serves on the chamber board. "This scholarship program will provide a small business owner and a nonprofit organization with the tools to help grow their own organizations and help our community."

**Companies helping
wildfire victims**

Several companies with local outlets are aiding the victims of the Southern California wildfires:

■ Wells Fargo is contributing \$250,000 to local chapters of the American Red Cross and an additional \$250,000 to other relief agencies to help with relief and rebuilding.

"Wells Fargo's generous donation will allow the Red Cross to meet the emergency and disaster-relief needs for thousands of people whose lives have been tragically altered by these raging fires," said Paul Schulz, CEO of the American Red Cross of Greater Los Angeles.

In addition, the bank is working to help affected customers manage through the recovery process. It is offering payment options for home mortgage holders; emergency unsecured loans of up to \$25,000; home equity line increases of up to \$25,000; case-by-case assistance for credit, check or ATM card holders; and emergency credit line increases, bridge and term loans, credit protection activation, skip-a-payment options and fee waivers for affected small businesses.

■ The PETCO Foundation recently began an emergency Round-Up program to raise money to help affected animals.

Round-Up is a nationwide opportunity for PETCO customers to "round up" their purchases to the next highest dollar as a contribution. All donations will go toward the foundation's ongoing relief efforts.

So far, PETCO, its vendors and the PETCO Foundation have provided products valued at more than \$200,000 to evacuation centers and animal welfare groups throughout San Diego County. In addition, PETCO associates have donated thousands of hours of time.

To donate online or to locate a store, visit www.petco.com.

■ The Dapper Frog has donated \$5,000 to the San Diego Humane Society for the care, protection and safety of affected animals. It comes on top of a \$2,000 donation recently made to Tillamook Animal Rescue.

"We have a policy at The Dapper Frog of making meaningful and focused contributions to the community, and feel at this time that we can help make a difference for those who can least help themselves — our animal family members," said Chief Executive Officer John McDonnell. For more information, visit www.dapperfrog.com.

Dennis Carlson adjusts the gas fireplace in the certified Energy Star home, McMinnville's first, that he and his wife Karen purchased. It was built by John Mead of Cellar Ridge Custom Homes.

First Energy Star shines in Mac

Energy-efficient design features keep the reins on carbon emissions, save on utility bills

By YVETTE SAARINEN
Of the News-Register

Even with construction going on all around, Dennis and Karen Carlson's home on Mount Mazama Street is so quiet they can almost hear a pin hit the floor.

The town's first certified Energy Star home, the two-story craftsman was built in the west hills by John Mead of Cellar Ridge Custom Homes in McMinnville.

Energy Star Homes is a program offered by the Environmental Protection Agency. It grew out of the Energy Star Appliance program, which offered various kinds of incentives for investing in the energy efficient models. In Oregon, the Department of Energy is the third-party agency which oversees certification.

Generally, Energy Star homes are built to efficiency standards that are 15 to 30 percent above code, according to John Morris, who heads the marketing division for the program's Northwest office in Portland. By building just 15 percent above code, it will have the same affect on carbon emission reduction as parking a car for two months out of

the year or planting 200 trees a year, Morris said.

One Energy Star home can keep 2,070 pounds of greenhouse gases out of the air each year. That's equivalent to not driving 2,244 miles, he said.

The Carlsons were struck by how easy it was to keep the house cool in summer and now that fall is here, how quickly it can be warmed up. Most days just turning on the gas fireplace for a little while does the trick.

Now that they are retired, they are looking forward to the \$200 to \$400 projected annual savings on energy bills.

Double-paned windows and insulated doors were tested for leakage and show a minuscule leakage rate. Other features include a high-efficiency heat pump and an air recovery ventilator that brings in air from outside and preheats it before circulating it through the house. That takes care of the humidity problem — one family can introduce 18 pounds of water into a house each year, Mead said.

An added bonus is that smells just disappear, Karen said. "The house always smells fresh," she said.

The hardest part, according to Dennis, is getting used to not opening the windows.

All of the systems are controlled at one programmable

Dayton High School students Michael Frank, left, and Scott Case weld steel parts together which will form animal pens at the Yamhill County Fairgrounds. FFA members from four high schools are making the pens from rod donated by Cascade Steel.

Cascade Steel rides to rescue

Mill donates \$50,000 worth of steel rod for livestock pens

By STARLA POINTER
Of the News-Register

A major donation by Cascade Steel Rolling Mills, coupled with the work of area FFA members, will benefit kids, animals and the Yamhill County Fairgrounds for years to come.

Cascade Steel — which happens to be the fairgrounds' neighbor — donated about 57,000 linear feet of solid

steel rod, worth more than \$50,000, said Al Westhoff, the county's fairgrounds manager.

FFA students from Dayton, Yamhill-Carlton, McMinnville and Amity high schools are welding pieces of the rod together to form about 900 fence panels. The panels, up to 12 feet long, can be put together in different configurations to serve as pens for FFA, 4-H and rodeo animals.

Having the steel pens will be a huge step forward for the fairgrounds, Westhoff said. Yamhill County Fair

organizers have always had to borrow or rent pens from the state fair in order to house all the animals that kids and adults bring to the annual event.

"We're the largest fair that doesn't have its own pens," Westhoff said. "That's embarrassing, especially considering the number of kids we serve," he said, noting 800 to 900 young people take part in the Yamhill County Fair each year.

Airport and Highway 18 most need attention, report says

By YVETTE SAARINEN
Of the News-Register

With no clear sense of attachment to either the Portland or Salem metro areas, McMinnville residents believe that they still can chart much of the city's own destiny, according to an analysis prepared for the McMinnville Economic Development Partnership.

MEDP is a partnership drawing members from city government, the chamber, McMinnville Water & Light, McMinnville Industrial Promotions and local businesses. It was formed to recruit and retain business and develop a strategic plan of economic development in the greater McMinnville area.

The newly released economic analysis, prepared by E.D. Hovee & Co. of Vancouver, Wash., updates demographic and employment trends to reflect current conditions. It includes results of focus groups as background information and provides input for strategic planning.

McMinnville's estimated 31,000 residents represent about 34 percent of the county's population of 91,700. The larger 97128 zip code adds about 3,200 for a total of 34,200.

McMinnville has been growing about 3 percent a year since 2000. That's faster than county and statewide rates and it's forecast to continue through 2023.

Manufacturing represents the No. 1 industry, accounting for 15 percent of the employment base. Two firms, Cascade Steel Rolling Mills and Evergreen International Aviation, fall into the largest category, 500-999 employees.

Two institutions, Linfield College and the Willamette Valley Medical Center, fall into the next category, 250-499 employees, along with two public agencies. Fifteen entities report 100-249 employees — five service providers, three retailers, three manufacturers, three public agencies and one wholesaler.

As of 2005, the McMinnville zip code area provided nearly 14,270 jobs, representing 46 percent of the countywide job base. Data indicates that establishments within the city limits account for more than 90 percent of employment within the 97128 zip code.

Average payroll per worker is just over \$31,400 per year, coinciding with the countywide average. Workforces average 12.2 for both the city and county.

The highest paid sector in McMinnville is management, averaging \$63,770 per year, followed by utilities/mining/unclassified, finance and insurance, construction, manufacturing and wholesale trade and transportation, in that order.

More than 97 percent of McMinnville residents commute to work. But they generally enjoy shorter commutes than their county or state counterparts.

Average travel time is 19.4 minutes, compared to 24.8 minutes countywide and 22.2 minutes statewide. Less than 18 percent of city residents work outside the county.

Retail purchasing power generated by residents of the 97128 zip code is estimated at \$294 million per year.

The most underserved retail sector is home furnishings, followed by food and beverage, then electronics and appliances. The most overserved sectors are sporting goods, hobbies, books, music, flowers, office supplies, stationery, gifts, used merchandise and auto parts.

However, according to the study, the apparent strength of specialty retailing is somewhat unusual for communities of McMinnville's size, reflecting its success with downtown revitalization.

The grocery sector has the most potential to support additional square footage, followed by the restaurant and home furnishings section.

The study projects McMinnville will add 7,420 new jobs by the year 2023. By then, it will need about 367 acres for new commercial and industrial development and more than 2.8 mil-

St., McMinnville, will host an open house from 6:30 to 8:30 p.m. on Thursday.

The event will celebrate recent remodeling and give the public a chance to meet the new branch manager, Chris McLaran.

Hors d'oeuvres and beverages will be available.

Free hearing tests offered locally

All American Hearing will host free hearing screenings by appointment from 9 a.m. to 5 p.m. Tuesday through Thursday.

Manager Brad Ford will perform the 30-minute exams.

The office is located at 2266 N.E. McDaniel Lane, next to the DMV. For an appointment, call 503-435-2083.

Honest Chocolates opens second shop

Honest Chocolates, McMinnville, is set to open its second store, this one in Newberg.

"Ever since we started selling chocolates in McMinnville, visitors have encouraged us to open more Honest Chocolates stores," said owner and chocolatemaker Dana Dooley. "With the opening of our Newberg location, we hope to be more accessible to our customers in northern Yamhill County and the greater southwest Metro area."

The new store, located at 312 E. First Street, is open from 11:30 a.m. to 6 p.m. Tuesday through Saturday. The phone number is 1-503-537-0754.

Meanwhile, Dooley will continue to make and sell chocolates at 313 N.E. Third St. in downtown McMinnville.

For more information, call 503-474-9042 or visit www.honestchocolates.com.

\$2,500 to \$3,000 a year. It's also a lot of work.

Westhoff said farmer Joe Sharp has helped with that, donating semis and drivers to bring the pens to McMinnville, then return them to their permanent homes.

Other than fair time, when the borrowed pens are on site, the fairgrounds hasn't had many of its own pens.

The Cascade Steel donation will mean pens are available for events year around.

After receiving the donated steel, Westhoff said fair organizers turned to FFA members

Watersheds to benefit from celebration

The Yamhill Watershed Stewardship Fund and Yamhill Basin Council will host a Celebrate Our Watersheds fundraiser from 7 to 11 p.m. next Saturday, Nov. 10, at the McMinnville Grand Ballroom, 325 N.E. Third St. It will feature a silent auction and live music by Sneakin' Out.

A donation of \$10 to \$20 is suggested. Wine, beer and hors d'oeuvres will be available.

For more information, call 503-474-1047.

Evergreen Helicopters working in Hawaii

Evergreen Helicopters Inc. of McMinnville launched a Helicopter Services and Support operation Thursday under contract with U.S. Army Garrison Hawaii on the island of Oahu.

Under the contract, the company will operate two new Bell 412EPs for operations on the islands of Oahu and Hawaii, one assigned to the garrison and the other to the Pohakuloa Training Area. They will be equipped with night vision goggles, rescue hoists and patient-support equipment.

Crews will remain on 24-hour standby for medical evacuation and wildland fire suppression. Priority 1 Air Rescue of Kauai will provide medical aid support.

"Evergreen and Priority 1 share a dedication to the aviation industry and a passion for using our constantly improving capabilities to protect life," said Ron Selvy, executive vice president of EHI. "We have a proven track record of successful teaming on various other assignments, and are confident that our combined expertise will benefit this area as well."

For more information, call 1-800-472-9361.

trial and commercial sites generally is viewed as being in good shape, according to the analysis.

Items requiring more attention are better development of airport-related activity, extended frontage roads to parallel Three Mile Lane and a new Highway 18 interchange to better serve the airport and nearby industrial sites.

mum, reducing the need for mowing. The owners instead opted for well-mulched gardens with low-growing plants and shrubs.

A showpiece of the house is the 6-by-28-foot front porch with three cultured stone pillars. The 1,820-square-foot home is in the \$339,000 range, Mead said. Design features rather than energy-efficient components placed it in that category, he said.

Morris said Mead is a leader in the Energy Star market and is targeting consumers who want to have better homes. He said Energy Star homes have higher resale and longer term value.

For more information, call Mead at 503-560-2263 or Morris at 1-503-310-2987, or visit the website at www.energystar.com. Locally, information about Energy Star Homes also is available from David Christie, conservation manager for McMinnville Water & Light, 503-472-6158.

for help in building the pens. "All the programs feature welding, so it was a natural," he said.

The fair auction committee helped students get started, loaning money for materials to build a special jig, for instance. The fair manager said the whole project has been a great partnership.

"Cascade's main interest is helping youth, and they're doing that," Westhoff said. "Not only will kids have pens for their animals, but they're getting experience cutting steel and welding," he said.

Central Oregon: Home builders try new ways to attract buyers

The Associated Press

BEND — With winter settling in over a cold residential real estate market, some Central Oregon builders are rolling out the deals to get something — anything — to move.

Oikos Homes will pay your mortgage interest for six months if you buy one of their empty homes on Empire Boulevard. The starting price: \$355,000. Mountain Crest Homes will give you \$50,000 in home furnishings if you take one of their townhomes for \$699,000 or more.

And Woodhill Homes, a builder of multiple subdivisions in the region is, in effect, partially converting itself into a landlord for the winter to keep its cash flows moving.

Woodhill has enrolled four buyer-renters into its lease-to-own option, a deal that lets buyers take up to two years to convert a leased home into a full sale in exchange for a small down payment, co-owner Jay Campbell said. It has contracted with a property manager to help take care of the 12 to 14 unsold houses that are now in its rental pool in the four subdivisions it's building in Bend and Redmond.

The builder will probably sell 50 homes this year, Campbell estimated, but that's only about half of its early year target. Meanwhile, with its construction pace pared to the minimum, the rents and lease-to-owns help keep the bills paid.

"We are in the business of buying and selling homes, but this is what we have to do today in order to see tomorrow," Campbell said.

Woodhill isn't the only builder trying to navigate through a frigid sales environment. Sales of single-family homes on an acre or less were down 27 percent through the third quarter of this year in Bend, compared with the same time last year, according to the Central Oregon Association of Realtors.

In Redmond, the volume plunged 48.3 percent.

In dollar amounts, the down-

Freightliner moves 341 jobs out of Oregon to South Carolina

The Associated Press

PORTLAND — Freightliner LLC is moving 341 jobs to South Carolina to be closer to the truck manufacturer's customers and production sites.

The heavy truck subsidiary of German automaker Daimler AG said the move to Fort Mill, S.C., affects about 10 percent of its Portland workforce, primarily in sales, marketing and dealer support positions.

Freightliner is the leading heavy-duty truck manufacturer in North America and has built trucks in Portland for 60 years. But the company has made several rounds of major job cuts in recent years. And last year, it moved production of its Freightliner-brand trucks to plants in North Carolina and Mexico.

"This has been a particularly challenging and eventful year for Freightliner," said Chris Patterson, president and chief executive officer of Freightliner.

But he added it was also a year of accomplishment because the company has been

able to post a profit in the face of a severe downturn in business, which he blames on a sluggish economy and fewer trucks hauling freight.

Freightliner will keep its headquarters in Portland but said future relocations are possible, depending on the dynamics of the market and its relationship with affiliates. The company also said some incentive contingencies are in place should it move more of its operations there.

The new South Carolina site is near the state border with North Carolina, where the Freightliner's bulk of manufacturing facilities are located.

"With our customers it matters that we be close to them, that we be in their faces on a regular basis and maintain strong relationships with our dealers," Patterson said.

Freightliner informed its Portland staff of the move Thursday morning and offered all workers an opportunity to relocate. The move is expected to be complete by July 2008.

Jonsson said his family loves the house — it's roomier than any of their rentals, and the wood floors, slate-tiled fireplace and well-appointed bathrooms are all the couple and their pair of teenage children need.

He likes what the arrangement has done for his credit, too. He said mortgage brokers have told him that building a track record of making regular payments on a house he already occupies will likely clear his way to a loan approval once he's ready to close on the deal,

despite the bankruptcy. Jonsson said he hopes to close on a loan by the end of the year. By that time, he figures, the monthly payment credits will add up to around \$3,000 to add to the \$7,000 he's already put down. His mortgage brokers figure they can get his monthly payments, including taxes, down to about what he's paying now on Woodhill's lease.

"You wouldn't think somebody who had declared bankruptcy two years ago would be in a house this nice," he said. "I guess what I would say to people is that there's hope. Don't feel like ... just because something happened to you in life, that you are never going to be able to buy a home and enjoy that part of the American Dream."

While their homes are under lease, Woodhill acts like any other landlord, doing all the maintenance and repairs and paying the property taxes.

Woodhill is looking for ways to "retool" its least-expensive Bend houses in an attempt to kick-start sales with minimum \$199,000 prices on their 1,200-square-foot models, down from the \$229,000 they're charging now, says co-owner George Hale. Meanwhile, he and Campbell are trying to keep their

building pace down to what they know they can sell.

"If there's no demand, it's kind of silly to go out there and keep building homes," Hale said.

Lease-to-owns give the builders some protection because they can generally keep the occupant's down payment and extra lease payments if they walk away from the lease before it converts to a sale, said Bill Berger, principal broker at the Bend branch of The Hasson Company Realtors.

But it carries significant risks, too, and not many builders have engaged in it so far in the region.

The tenants could trash the house and move out, leaving the builder with a house that's been converted from brand-new inventory to second-hand, at best.

Or, their tenants could walk away from the deal if the value of the house declines by more than their down payments are worth — leaving the builders in worse shape than they were at the start.

On the other hand, it beats paying taxes and maintaining upkeep on an empty house through a long, cold winter.

"If they've got cash to give to the bank, then that is the upside to it," Berger said.

Rotary Club of McMinnville's

Environmental Tip

of the week

Cool Weather

Be smart about keeping warm at home. If you haven't checked the doors and windows for drafts, there is still time to install low cost insulation, caulking, and plugging drafts around electrical outlets.

Another smart thing that will insure comfort and lower cost of energy is a new, clean air filter for your duct system. While you are at it check the vents for leaks and insulation. If you have a heat pump, have it inspected for efficiency operation. Update your thermostat.
